

Birthright — Version Index

TIGHT HISTORY OF EVERY SHIPPED VERSION · REFRESHED MAY 25, 2026 09:26 UTC

How to read this document. Three sections — Shipped (newest first), In progress (currently being built), and Backlog (prioritized but not yet scheduled). Cross-references to scope PDFs are `monospaced`.

1 · Shipped

VERSION	DATE	PHASE / ITER	WHAT SHIPPED
v1.11.0-step9 + share-coverage	May 25, 2026	SHIPPED Iter 20	Subscription UI parity + universal Share/Print/Download coverage. Step 9: partner-initiated cancel (non-destructive — license stays until expires_at; status='cancelled'); mid-flight plan change with prorated credit (free upgrade when credit >= new price else Stripe checkout for the delta); admin /admin/subscriptions page with filter chips, status pills, revoke + optional Stripe refund modal. Webhook fulfillment now handles supersedes_subscription_id end-to-end. ShareButton placement completed everywhere user requested: partner directory cards, governance board member cards, join-us list cards, workshops list cards, shop product cards (non-material), facilitators list + profile, research artifact cards, plus detail pages. Universal Print (window.print() with @media print rules in App.css that hide nav/footer/share) and Download QR PNG (rasterizes the SVG to a 4× canvas PNG; hidden QR pre-rendered so first click works). Privacy matrix preserved. 16/16 backend tests PASS.
v1.11.0-step8+8.5	May 25, 2026	SHIPPED Iter 19	Disbursement orchestration + Universal Share & Save System. Step 8: admin disbursement-settings (next_disbursement_date, cadence, partner-visible notes) at /admin/payouts; ready-to-pay aggregation gated to W9 + payout method on file; CSV export of pending payouts; partner email notification on mark-paid (disbursement_notification template). Step 8.5: ShareButton component (Copy/QR/Email/SMS/Bookmark/ICS/Cite icons context-aware) with `via=` referral attribution that sets the birthright_ref cookie

VERSION	DATE	PHASE / ITER	WHAT SHIPPED
			when sharer is an active community partner. Backend: POST /api/shares/log (anon-friendly), GET/POST/DELETE /api/me/bookmarks (polymorphic), GET /api/research/{id}/cite?format=apa7 bibtex, GET /api/workshops/{id}/ics, GET /api/me/share-token. New pages: /dashboard/bookmarks. Share buttons placed on workshop detail, product detail, research artifacts, partner profiles, join-us roles. Privacy matrix respected: no share on workshop materials, ledger rows, W9, payout methods, admin dashboards. qrcode.react npm pkg installed for client-side QR rendering.
v1.11.0-step6+7	May 25, 2026	SHIPPED Iter 18	Paid Research Promotion + Payouts scaffolding. New /research public page with Promoted top section + general listing; partner-side CRUD at /dashboard/partner/research with tiered Stripe checkout (\$49 brief / \$149 peer-reviewed paper / 30 days). Stripe webhook fulfillment for `research_promotion` type; activate_research_promotion extends promoted_until on paid. Admin tier-override + free promotion grant/revoke. /partners directory got a Featured strip at top (auto-hidden in samples mode). Payouts UI: /dashboard/partner/payouts with 3 tabs (Ledger from referrals + off-site credits, W9 form persisted + signed, Payout method capture — Stripe Connect account OR encrypted ACH using Fernet PAYOUT_ENCRYPTION_KEY). Admin endpoints: list credits, mark-paid (one-way), view W9 (audit-logged). 2 sample research artifacts seeded. Header nav tightened to fit 11 items with no overlap on 1280px+, mobile menu activates below xl breakpoint. Backend 32/32 PASS, frontend 100%.
v1.11.0-step4+5	May 25, 2026	SHIPPED Iter 17	Featured-Partner Showcase + Founding-Partner gating. Self-serve featured slots at \$99/30 days via Stripe (random shuffle on /featured, gold ribbon across directory, editable content while window active). Admin grant/revoke + comped slots. Founding-Partner program: opt-in checkbox on /partners/apply with public 'X/cap' counter and progress bar; auto-grant on application approval if cap has room (5-year locked rate); admin cap controls + grant/revoke endpoints.

VERSION	DATE	PHASE / ITER	WHAT SHIPPED
			Founding badges visible across directory + profile pages (including samples). Backend 20/20 PASS, frontend 100% after Founding badge + nested-anchor fixes.
v1.11.0-step2+3	May 25, 2026	SHIPPED Iter 16	Outbound-click attribution + Off-site sales reconciliation. GET /api/out/{slug} redirect endpoint with UTM capture, IP/UA logging, host-locked dest param, fallback to /partners on 404. Outbound links surfaced on vendor + community partner cards/profile pages only. Partner self-report flow at /dashboard/partner/sales-reports with monthly defaults + HMAC webhook (per-partner secret, SHA-256 signed payload, rotate-anytime). Admin reconciliation at /admin/partner-sales-reports with approve/dispute/revise actions and optional override_gross/override_pct. Credits land in partner_off_site_credits with pct sourced from rev_share_overrides.off_site_pct → active subscription → global default. Backend 25/25 PASS, frontend 100%.
v1.11.0-step1.5	May 24, 2026	SHIPPED Phase 6B.4.5b + 6B.4.5c (Iter 15)	Join Us + Sample Partner Profiles. 3 open foundation roles (Board Chair & Co-Founder, Research Advisor, Director of Community Stewardship) with public /join-us listing, application form, and admin triage queue (6-status pipeline). 8 sample partner personas (2 per partner type) marked is_sample:true, hidden from default /partners directory, surfaced at /partners?samples=1 as a sales tool for founding-partner outreach. Governance page got SAMPLE ribbons on the 3 recruited-for board cards. Backend 21/21 PASS, frontend 100%.
v1.11.0-step1	May 23, 2026	SHIPPED Phase 6B.4.5a	Partner economy model overhaul: PartnerProfile gained 13 new fields (founding partner, featured-until, rev-share overrides, external site URL, payout fields, W9 status). Subscription tables regenerated with inverted pricing (longer commitment = lower fee and lower foundation take rate).
v1.10.1	May 2026	SHIPPED Iter 14 — Runtime hardening	runtime_seed.py for production self-heal: catalog backfill from data/catalog.json, known broken-image repair, partner economy backfill defaults.

VERSION	DATE	PHASE / ITER	WHAT SHIPPED
v1.10.0	May 2026	SHIPPED Iter 12+13 — Phase 6B.4	Vendor autonomous catalog: vendor CRUD on own products, admin moderation (flag/unpublish/restore), public store badges, vendor dashboard tab.
v1.9.0	May 2026	SHIPPED Iter 11 — Phase 6B.3	Community referrals + reporting MVP: /api/r/{code} redirect-and-cookie, referral attribution on checkout, payout ledger, /admin/payouts, MyReports.
v1.8.0	May 2026	SHIPPED Iter 10 — Phase 6B.2	Partner subscriptions: tiered plans, Stripe-checkout-as-recurring with manual renewal, tier perks, plan picker, admin subscription view.
v1.7.0	Apr 2026	SHIPPED Iter 9 — Phase 6B.1	Partner foundation: applications (4 types — facilitator, community, research, vendor), profiles, public directory, admin queue, partner dashboard.
v1.6.1	Apr 2026	SHIPPED Iter 8 — Hardening	Code-review cleanup: component splits, helper extractions, type hints throughout, large-function decomposition where it added clarity.
v1.6.0	Apr 2026	SHIPPED Iter 7 — Governance & Legal	Governance defaults, proposals + voting, universal indemnification versioning, audit log, governance/ombudsman role flags.
v1.5.0	Apr 2026	SHIPPED Iter 6A — Reviews	Universal polymorphic reviews (workshop/product/service), anonymous mode, verified-purchase flag, moderation, reporting, /reviews browser.
v1.4.0	Apr 2026	SHIPPED Iter 5 — Realtime chat	WebSocket chat (group + DMs), per-workshop ws_manager, presence, JWT cookie handshake, soft-delete, profanity guard.
v1.3.0	Mar 2026	SHIPPED Iter 4	Workshop photos: participant uploads, moderation queue (approved/pending/rejected), thumbnails, S3-style storage path.
v1.2.0	Mar 2026	SHIPPED Iter 3 — Email infra	Resend integration with EMAIL_DRY_RUN flag, transactional templates (registration, reminder, refund, support, contact, sponsorship), audit logging.

VERSION	DATE	PHASE / ITER	WHAT SHIPPED
v1.1.0	Mar 2026	SHIPPED Iter 2	Stripe webhook signature verification, refund flow, polymorphic order model, audit improvements.
v1.0.0	Feb 2026	SHIPPED Phase 1	Foundation MVP — public site, workshops, shop, sponsorship, registrations, participant dashboard, workshop hub (8 tabs), facilitator dashboard, admin dashboard.

2 · In progress

TARGET VERSION	STATUS / ITEM	SCOPE
v1.11.0-step10	IN PROGRESS Refund/clawback cascade + Partnership agreement v2	Cascade refunds back through credits + payouts and require partners to re-sign agreement v2 on next login.

Current sequence: v1.11.0-step6+7 shipped together on May 25, 2026 (Iter 18). Next up: v1.11.0-step8 (disbursement orchestration + CSV export) and v1.11.0-step9 (subscription UI parity). After that: v1.11.0-step10 (refund/clawback cascade + partnership agreement v2 with re-sign). Phase 6B.5 (Research submissions queue) remains paused until v1.11.0 is fully shipped — scope PDF already exists at [birthright-phase-6b5-research-scope-v1.pdf](#).

3 · Backlog

ITEM	STATUS	SCOPE
v1.11.0-steps 4–10	BACKLOG	Featured-partner showcase, founding-partner gating, paid research promotion, /partners rebuild with 5-tab pattern, payouts infra (W9/1099 collection), subscription UI parity, refund/clawback cascade, partnership agreement v2 with re-sign.
Phase 6B.5	BACKLOG	Research submissions queue: data model, public listing, admin moderation, DOI minting. (Scope PDF already exists, paused pending v1.11.0.)
Phase 6C	BACKLOG	Communications: user ↔ partner DMs, partner ↔ partner DMs, ombudsman dashboard, dispute/escalation workflow.
Phase 6B.6	BACKLOG	'More Info' / FAQ contextual modals site-wide. Depends on 6C for ombudsman endpoints.
Discovery & Search	BACKLOG	Advanced cross-site search (products + workshops + partners), comparison view, vendor filters.
/music	BACKLOG	Curated mood/activation playlist library (YouTube + CC embeds).

ITEM	STATUS	SCOPE
Email live mode	BACKLOG	Flip EMAIL_DRY_RUN=false once Resend DNS verification clears on birthright.live.
Tech debt	BACKLOG	Rate-limit auth + chat WS; Redis pub/sub for ws_manager; admin self-demotion guard; Stripe webhook signature verification audit; sponsorship tier upgrade flow; Twilio SMS check-in reminders; multi-language (en/es).
